Claims Allowed

Claims 1-6 are allowable over the prior art of record. The claims are allowed because the prior art does not anticipate nor render obvious the invention of a seven speed planetary gear transmission with three planetary gear sets, each set having three members, an input shaft continuously connected to a sun gear of the second gear set, an output shaft continuously connected to a carrier of the third set, a first interconnecting member continuously connecting a ring gear of the first gear set with a carrier of the third gear set, a second interconnecting member continuously connecting a carrier of the first gear set with a ring gear of the second gear set, a first, second and third brake, a first, second and third clutch, the clutches and brakes being engaged in groups of two to establish the seven forward speeds and a reverse speed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior Art Discussed

The examiner has considered the references cite by applicant in his Information Disclosure Statement filed January 23, 2004. None of the references show all of the features of the claimed invention.

The reference cited by the examiner is deemed pertinent to applicant's disclosure. Martyka '370 shows a seven speed planetary transmission with three gear sets, is commonly assigned, but was filed less than one year before the instant application.
